

WHAT:

Man in e.SPACe.mov

WHERE:

l'espace EDF Electra
6 Rue Récamier
Paris [F]

WHEN:

Wednesday 11.05.2005
start: 19:00 h

LAB[au] + Wolf K _ Res Publica invited for the opening of the:
Nicolas Schöffer exhibition

at:

l'espace EDF Electra, 6 Rue Récamier Paris [f]

to present their performance: " Man in e.space.mov "

"My themes - the human figure in space, its moving and stationary functions, sitting, lying, walking, standing - are as simple as they are universally valid. Besides they are inexhaustible."

Oskar Schlemmer

The performance ' MAN in eSPACE mov ' is the result of a collaboration between the French based dance company 'Res Publica' and the Belgian collaborative agency LAB[au] _ between dance and architecture. The performance is a first step towards an interactive dance performance examining the notions of space and action - movement , confronting them to communication and computation technologies which extend perception and understanding, to eventually underline the relationships between body and space _ bodyspace.

Special thanks to: Eléonore de Lavandeyra Schöffer
